DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I drawn to a combinatorial optical processor comprising N addressable optical elements, where N greater than or equal to 1.

Species II drawn to a combinatorial optical processor method for producing an image of an object using randomly addressable optical elements.

Species III drawn to a method for optical D/A conversion using a combinatorial optical processor comprising N addressable optical elements.

Species IV drawn to an imaging system comprising N addressable optical elements, where N greater than or equal to 1.

Species V drawn to a three-dimensional display apparatus comprising optical modules and a module controller, wherein the optical modules comprise N addressable optical elements, where N greater than or equal to 1.

Species VI drawn to a linked combinatorial optical system comprising a pair of linked combinatorial optical systems, each having N addressable optical elements.

Species VII drawn to a compound linked combinatorial optics system comprising a pair of combinatorial optical linked systems, each having a pair of linked combinatorial optics systems comprising N addressable optical elements.

Art Unit: 2872

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.
